**Fangzhou Xie** (2022). rethnicity: An R package for predicting ethnicity from names. *SoftwareX*, 17, 100965. [Link](#).

*Summary: I built a package to predict ethnicity from names and published it on CRAN for R users. [Github](#).*

**Fangzhou Xie** (2020). Wasserstein Index Generation Model: Automatic generation of time-series index with application to Economic Policy Uncertainty. *Economics Letters*, 186, 108874. [Link](#).

*Abstract: I propose a novel method, the Wasserstein Index Generation model (WIG), to generate a public sentiment index automatically. To test the model's effectiveness, an application to generate Economic Policy Uncertainty (EPU) index is showcased.*

## Proceeding

**Fangzhou Xie** (2020). Pruned Wasserstein Index Generation Model and *wigpy* Package. *CARMA 2020*. [PyPI](#).

*An extension to WIG model that will deal with large corpus. Lasso was used to shrink the dimension of vocabulary, so that it could be easier to calculate the Optimal-Transport distance matrix.*
